Good morning, Gerald.

I understand that last week's meeting with Ken last went very well, and Ken acknowledged that the HPOZ should not have included the 1330 Pico site. I believe that Ken may have mentioned that to correct the mistake will take about 6-9 months. I've reviewed the Zoning Code to learn more about the process of correcting technical errors. Sec. 12.20.3 F.3 (d)(3) appears to delegate this decision to the Planning Director. That is, the Director can make the corrections after consulting with the Board of Historic Preservation and the Cultural Heritage Commission. Subsection 'e' requires that we file a request to correct the technical error. We will, of course, comply with this obligation.

I don't know that anything is required beyond this step, but if the HPOZ must be amended by ordinance, there is an expedited process to do this. In fact, our office is working with City Planning on another case where the zoning was incorrectly placed on the property. The Planning Department is taking this correction directly to PLUM and the City Council (the Director is "signing off" for the Commission). This process is taking about 6-8 weeks.

Would you please let Ken know that I would like to follow up with him - or you can simply forward my email to Ken. As soon as I know that Ken's been brought into this additional discussion I will contact him.

I don't think anyone wants to delay the progress of our client's project while waiting for the correction to the HPOZ. We are likely to be in the position to file the application within the next 2-4 months so it would be good to have the HPOZ matter resolved before our filing.

Thank you,

Joel
